Pacific Islands Countries and Areas

French Polynesia

A total of 43 confirmed dengue cases were reported in French Polynesia between week 9 and week 10 (19 cases in week 9 and 24 cases in week 10) (Figure 9). Eleven (26%) of the 43 cases were confirmed as DENV-1 infection.

Figure 9: Number of laboratory-confirmed cases of Dengue per week in 2016-2017, Centre for Occupational Health and Public Safety, French Polynesia

New Caledonia

As of 28 March 2017, 2115 dengue cases were reported since September 2016, indicating an increase in the number of cases since September 2016 (Figure 10).
