

## Update on the Dengue situation in the Western Pacific Region

### Northern Hemisphere

#### China (No updates)

As of 31 July 2016, there were 237 cases of dengue reported in China in 2016. This number is lower than the number of cases reported in the same period of the previous four years (2012-2015) (Figure 1).

National Health and Family Planning Commission

#### Malaysia

In week 34, the number of dengue cases was 2,249, an increase from 2,190 cases (an increase by 2.7%) reported in the previous week. The cumulative number of cases in 2016 (73,839 cases) is less than that reported during the same period in 2015 (80,654 cases). By week 34, the cumulative number of dengue deaths was 166 cases, compared to 219 deaths during the same reporting period in 2015 (Figure 2).

## Viet nam (No updates)

As of 30 June 2016, there were 36,639 cases of dengue including 11 deaths, reported in 44 out of 63 provinces in Viet Nam. This is an increase of 184.7% from same period in 2015 and an increase of 102.7% over the 2011-2015 median; but the number of deaths decreased by 3. In June 2016, there were 5,225 cases reported including one death.

## Southern Hemisphere

### Australia

As of 31 August 2016, there were 1,652 laboratory-confirmed dengue cases in Australia. The number of cases reported has been decreasing since March and it follows the seasonal trends (2011-2015) (Figure 8).

Department of Health, Australia

## Pacific Islands Countries and Areas

### French Polynesia

In week 34, 49 confirmed dengue cases were reported in French Polynesia (Figure 9). Eight (16%) of the 49 cases were confirmed as DENV-1 infection.

### Papua New Guinea (No updates)

From 1 January to 5 June, 67 imported cases of dengue with travel history to Papua New Guinea were reported by Queensland Health (notifiable conditions data). Among these cases, 5 were DENV-1, 48 were DENV-2, 3 were DENV-3, 1 was DENV-4 and 10 cases were of undetermined serotype.

### New Caledonia

Since 1 September 2015 to 6 September 2016, 532 dengue cases were reported. In August 2016, 56 dengue cases were reported (Figure 10).
