## Influenza Situation in Singapore 2015

Influenza indicators for E-week 39 (27 Sep - 03 Oct 2015) are as follows:

The average daily number of patients seeking treatment in the polyclinics for ARI increased from 2,738 (over 4.5 working days) in E-week 38 to 2,929 (over 5.5 working days) in E-week 39.

The proportion of patients with influenza-like illness (ILI) among the polyclinic attendances for ARI remained low at approximately 1%.

The overall prevalence of influenza among ILI samples (n=78) in the community was 26.0% in the past 4 weeks. Of the specimens tested positive for influenza in September 2015, these were positive for influenza B (59.0%), influenza A(H3N2) (32.0%) and influenza A (H1N1)pdm09 (9.0%).

\* Based on influenza-like illness (ILI) samples from GPs and polyclinics
