HIV/AIDS		2		26			
Legally Notifiable STIs**	60	660		420)()		
Tuberculosis	100			85	5		

^{*} Preliminary figures, subject to revision when more information is available.

^{**} Wef Jan 2010, reporting has changed from <u>all</u> types of STIs to <u>legally notifiable</u> STIs, which comprise gonorrhoea, non-gonococcal urethritis, syphilis (congenital, infectious, non-infectious), chlamydia and genital herpes (first episode and recurrent).

^{***} Wef E-week 6 of 2012, the no. of polyclinic attendances will be reflected on an average daily basis, instead of weekly basis, so as to take into account the number of working days in an E-week at the polyclinics for a more accurate representation of the underlying trends in the community.

Influenza Situation in Singapore 2014

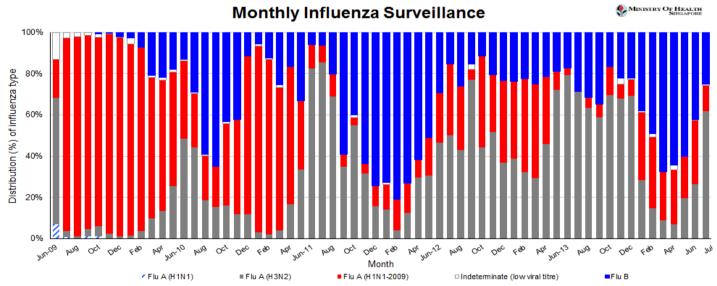

Influenza indicators for E-week 33 (10 August 2014 - 16 August 2014) are as follows:

The average daily number of patients seeking treatment in the polyclinics for ARI decreased from 2,683 (over 5.0 working days) in E-week 32 to 2,654 (over 5.5 working days) in E-week 33.

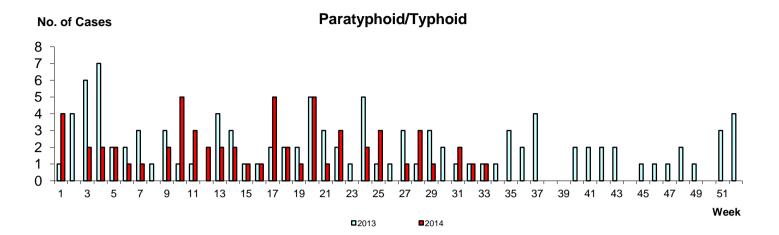

The proportion of patients with influenza-like illness (ILI) among the polyclinic attendances for ARI remained low at 1%.

The overall prevalence of influenza among ILI samples (n=230) in the community was 63.9% in the past 4 weeks. Of all the influenza virus isolates in July 2014, influenza A(H3N2), influenza B and influenza A(H1N1-2009) comprised 61.7%, 25.3% and 12.6% respectively.

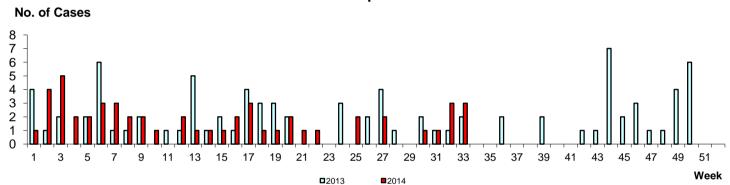

^{**} Based on influenza-like illness (ILI) samples from GPs and polyclinics
