#### **Viet Nam**

In February 2017, there were 5,447 dengue cases reported (including 5 deaths) from 39 out of 63 provinces (58 provinces and 5 municipalities existing at the same level as provinces) in the country. The number of cases decreased by 17% compared to the previous month and by 7.7% compared to the same period in the previous year. Cumulative number reported in the first two months of 2017 is 12,848 cases including five deaths. Compared to the same period in 2016 (19,242 cases/7 deaths), cumulative number of cases decreased by 33.2%, decreased two deaths. Compared to the median of 2011-2015 period, number of cases increased by 94.7% (Figure 6).
