# Update on the dengue situation in the Western Pacific Region

# **Northern Hemisphere**

## Japan (No new update)

As of 31 October, the Ministry of Health, Labour and Welfare (MHLW), Japan, reported a total of 160 confirmed autochthonous cases of dengue fever. None of these cases had recent overseas travel history. While cases were reported throughout Japan, the majority (143/160, 89.4%) were associated with visiting Yoyogi Park or its vicinity in Tokyo. The number of new cases being reported is decreasing with the most recent case reported on 15 October. To date, dengue virus serotype 1 has been isolated.
